## Ricardo congratulates Greaves on the launch of the new D Series engine family

- **Completely new D Series engine family designed and developed in collaboration with Ricardo**
- **Engine range extends from in-line 6-cylinder configuration up to a V12**
- **Designed for power generation applications – in particular the high demand 250kVA and 500kVA segments**
- **Provides Greaves with a class-leading engine in terms of both manufacturing and operating costs**

The new Greaves Power D Series engine was unveiled on Saturday by Greaves group Chairman Karan Thapar, at a ceremony held at Bengaluru, marking the successful conclusion of a collaborative project with Ricardo announced less than two years ago. The new engine has been designed to be capable of meeting international emissions regulations, being fully engineered from the outset for US Tier 3 emissions levels and with clear upgrade path protection for Tier 4 compliance without the need for significant hardware changes.

“On behalf of Ricardo I would like to congratulate Greaves on the launch of its new D Series engine family,” commented Ricardo India president Mayank Agochiya. “The unveiling of this brand new, state-of-the-art engine family marks a very successful milestone in the longstanding relationship of co-operation between Greaves and Ricardo, delivering a new clean and fuel efficient power generation engine for the domestic Indian as well as international markets.”

“Greaves Cotton Ltd and Ricardo both have long histories and a strong heritage of engineering innovation and technology development,” added Prakash Bhalekar, CEO of Greaves Industrial Engines Business, Auxiliary Power Business and Engine Component Technologies. “We are pleased to have been able to continue our longstanding collaboration with the development of the D Series engine family over the past two years. We now look forward to bringing this high quality, low emissions engine to market for the benefit of our customers in India and abroad.”

Ends

## NOTES TO EDITORS:

**Ricardo plc** is a global, world-class, multi-industry consultancy for engineering, technology, project innovation and strategy. With almost a century of delivering value, we employ over 2300 professional engineers, consultants and staff. Our people are committed to providing outstanding value through quality engineering solutions focused on high efficiency, low emission, class-leading product innovation and robust strategic implementation. Our client list includes the world's major transportation original equipment manufacturers, supply chain organizations, energy companies, financial institutions & governments. Guided by our corporate values of respect, integrity, creativity & innovation and passion, we enable our customers to achieve sustainable growth and commercial success.
